It does not act as I expect it too: it does not display a letter and then wait for me to pronounce it. Sometimes it just presents the pronunciation and does not show the letter when I click "show answer". When I click edit card, the card formatting info seems OK.	2017 or earlier	Not Fixed	Trainer was checked regarding this feedback, but the user feedback was deemed to be was mistaken, irrelevant, not worth fixing or already fixed.	N/A
What difference am I supposed to be hearing in the words in the following cards: Cards 49 & 53 (Дэв vs deaf, both with the same IPA of dɛf), Cards 66 & 70 (Сэт vs set, both with the same IPA of sɛt), Cards 171 & 173 (голо́дное vs голо́дная, both with the same IPA of gɐˈlodnəjə)? The IPA is the same, and the differences in the audio file are extremely subtle to me.	4/6/18	Fixed	N/A	The English/Russian pairs will often have the same IPA. (And is still a valid pair). Typically Russian/Russian should have minor differences. 49/53 and 66/70 - no change. Let's remove 171/173.
